

Player Game Installation

Updated: 2025/04/14

Doc: Version 4.2

Welcome and thank you for choosing the Redsuns2020 Mod for Deus Ex.
Please ensure Deus Ex is already installed on your computer before proceeding.

Available Versions:

- **Steam DX Version**
- **GOG DX Version**
- **Custom Install**

Note: The "Game of the Year Edition" used by Steam and GOG includes the multiplayer patch..
If you're using the original CD version, please apply the **`DeusExMPPPatch1112fm.exe`** patch before installing the mod. The patch is included under deusex/redsuns/misc folder.

For Steam Users

It is highly recommended to select the option to create a desktop shortcut during installation.
Running the shortcut can bypass the dreaded steam.dll issues.
Another solution is to use the Steam.dll file included under the MISC folder.

Custom Install

The Steam or GOG version if selected will auto install on C drive.
If you have Steam or GOG installed on a different drive, use custom install.
If you are using an original CD then select custom install.

Recommend: Install the New Vision Mod

Before even playing Redsuns2020, I recommend to install the following mod;

New Vision Mod

<https://www.moddb.com/mods/new-vision/downloads/new-vision-15>

- Allows you to install Direct3d 10 Renderer
- Allows you to run Kentie's Launcher
- Replaces DX textures to better ones

With the Launcher, you can select Direct3d10, and monitor solutions for your modern display.
New Vision Mod uses high rez textures so makes the game look better.
It does not make redsun2020 custom textures higher rez but it does make the mod feel better.

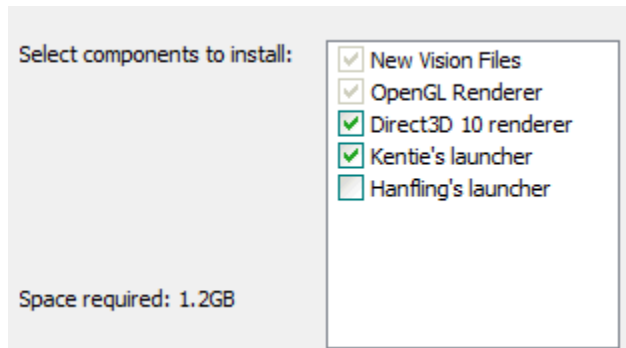

Installation Workflow

Order to install

1. Install Deus Ex (via Steam, GOG or original CD)
2. Install MP patch if you are using original CD
3. Install New Vision mod

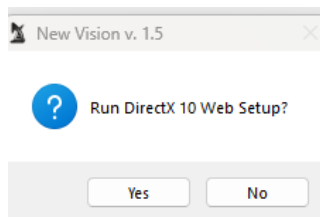

Select Option: Direct3d 10 renderer

Select Option Kentie's Launcher

4. If asked to install Visual C++ 2010 Redistributable <- Select **YES**

5. Run DirectX 10 Web Setup <- Select **YES**

6. Run the Redsun2020_Setup Wizard

Select Option to create shortcut to desktop

Additional icons:

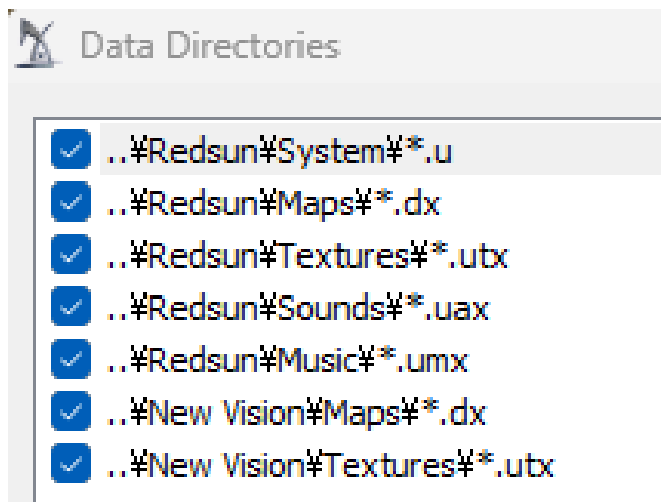

- ☒ Create Redsun2020 Shortcut
- ☒ Create Uninstall Shortcut

7. Run Redsun2020.exe via Shortcut

Kinetie's launcher should show up as follows;

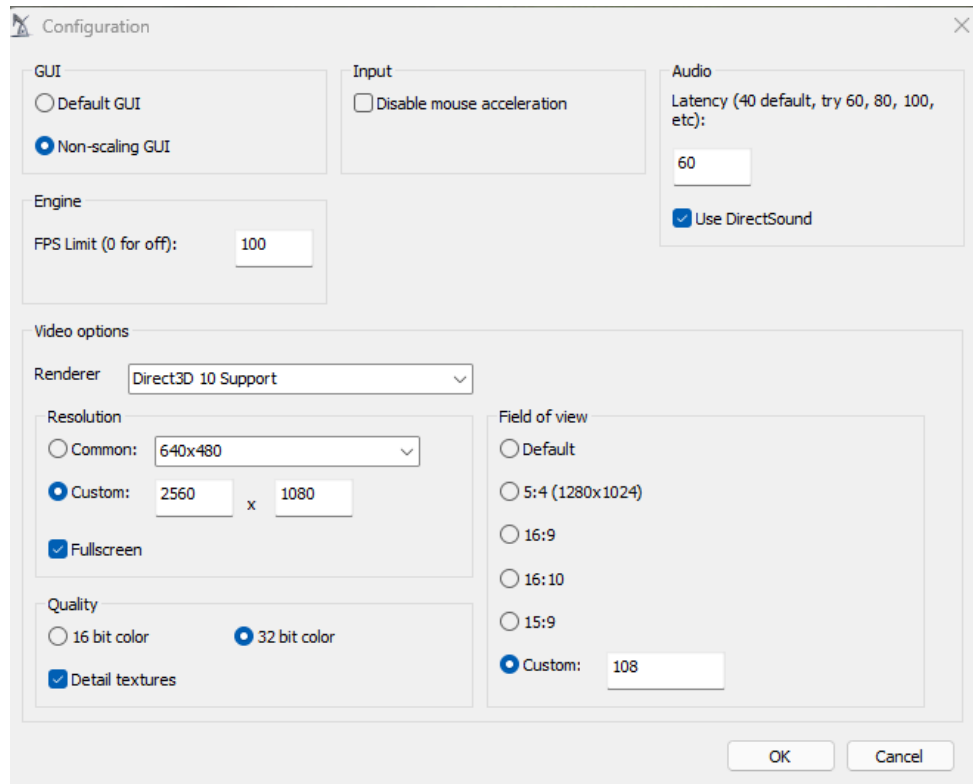

8. Confirm all Data Directories are checked.

9. Configuration; As you like.

Recommend to select **Direct3D 10 Support** as the Renderer.

Important: Change the Audio from 40(default) to **60** or above with DirectSound selected.

File Structure Overview

The setup package will create a structure under your Deus Ex installation directory, including a **Redsun** folder with maps, music, sounds, misc and system files necessary for the mod.

The **Deus Ex/System** folder will include **Redsun 2020** specific INI, INT, EXE, and LOG files to facilitate the mod's running.

Please checkout **Redsun2020_readme.txt** located in the redsun directory after setup for more details.

MISC

> The DX MP patch is included.

Caution with Nvidia Drivers

If you find the game crashes when trying to play any of the DeusEx games and mods, please check the PC version of Nvidia Drivers. A stable driver for Windows 10/11 is version 566.36.

Process to re-install drivers;

1. Download and run NVCleanstall_1.18.0.exe
2. Download and install 566.36-desktop-win10-win11-64bit-international-dch-whql.exe
